PROFESSIONAL SUMMARY

Enthusiastic Software Development Engineer Intern with hands-on experience in Java, DSA, Python, and Django. Skilled in building scalable web applications, responsive frontends, and optimized backend systems. Strong foundation in problem-solving, database management, and Agile practices, delivering clean, maintainable code while collaborating effectively in team environments.

TECHNICAL SKILLS

Programming Languages: Java, Python, C
Web Technologies: HTML5, CSS3, JavaScript, Django
Database Technologies: SQLite, JDBC
Development Tools: Git, Eclipse IDE, Visual Studio Code
Methodologies: Agile, SCRUM, SDLC

PROFESSIONAL EXPERIENCE

Software Development Engineer Intern

Infosys Limited

July 2025 - Present

- Working on Java-based development and implementing efficient data structures and algorithms for project modules
- Developing and optimizing algorithms to improve code performance and reliability
- Collaborating with the team to analyze requirements and implement solutions using best coding practices
- Gaining hands-on experience in problem-solving, debugging, and code optimization in real-time scenarios

Django Framework Intern

APSSDC

May 2024 - August 2024

- Designed and developed a Library Management System using Django, Python, and SQLite database
- Built responsive frontend interfaces using HTML, CSS, JavaScript, and Bootstrap framework
- Implemented security features including user authentication and authorization systems
- Created database models and queries to manage book inventory, member records, and transaction history
- Developed automated notification system for due dates and overdue book alerts

PROJECTS

Blood Bank Management System

- Built a comprehensive Blood Bank Management System using Django and SQLite with a focus on data integrity
- Designed and implemented RESTful API endpoints to handle donor and patient blood requests
- Developed admin dashboard with real-time monitoring capabilities and request processing workflows
- Created database schema optimized for tracking blood inventory, donor history, and patient requirements across development, staging, and production environments

Library Management System

- Developed a full-stack Library Management System using Python, Django Framework, and SQLite database
- Implemented multi-user authentication system with role-based access controls for Admin, Teacher, and Student users
- Engineered CRUD operations for book inventory management, tracking loans, returns, and automated fine calculations
- Created responsive user interfaces using HTML, CSS, JavaScript, and Bootstrap for optimal user experience

Neural Chirps: Bird Species Identification

- Applied deep learning techniques and Artificial Neural Networks for bird species identification from audio data
- Performed signal processing on audio recordings to extract distinctive features for species classification
- Implemented multilayer perceptron (MLP) classification algorithm for accurate species identification
- Utilized Python scientific libraries (NumPy, SciPy) for data processing and model implementation

EDUCATION

Bachelor of Technology, Computer Science and Engineering

Godavari Institute of Engineering and Technology

2020 - 2024 — CGPA: 8.38

Intermediate

Narayana Junior College

2018 - 2020 — CGPA: 9.79

10th Class

Viswa Santhi High School

2017 - 2018 — CGPA: 9.20

CERTIFICATIONS

- Microsoft: Introduction to Programming using Python
- Web Development with Django (APSSDC)
- AWS Cloud Computing (APSSDC)

ACHIEVEMENTS

- Led project team at STARTUP SPRINT; ensured quality with Agile and code reviews
- Hackathon finalist at MEDHA Fest; built scalable real-time app under pressure
